

# Boccaporto

Designed by Metrica

Boccaporto is a combined seating and working unit, developed for open offices and public areas. In addition to the single seat, Boccaporto is available in a one –and two seat option. This unique seating collection also provides an isolated environment for personal or team work. Finally, Boccaporto offers the ability to create more private working environments in crowded places such as libraries, airports, etc.

# Technical Specifications

## Boccaporto

### Materials & Finishes

- The body is made of polyurethane reinforced with metal fixture. The backrest is made of 15 mm (0.6 inch) plywood, and its inner and outer surfaces are coated with 10 mm (0.4 inch) gray foam.

- The leg part of the product is doubled by the use of 25+25 mm (0.9+0.9 inch) MDF, and coated with black lacquer paint.

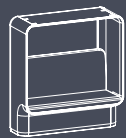

- The inner body and surfaces may be coated with fabrics of different colors.

- The product is equipped with LED and USB port.

### Fittings

- Metric bolts, steel bushes and nuts are used in the installation process.
